Warehouse Management

Sales Order Processing

Sales order processing management services are also coming under this category, many warehouses and sales are now being connected through the use of the internet, more specifically via software

01

New Customer Orders are sent to warehouse staff, to check billing.

02

The staff gets alert and after making required changes, the status of order will be changed on software

03

At each stage of process customers also receive alerts

04

Order Progress is shared with Customer.

05

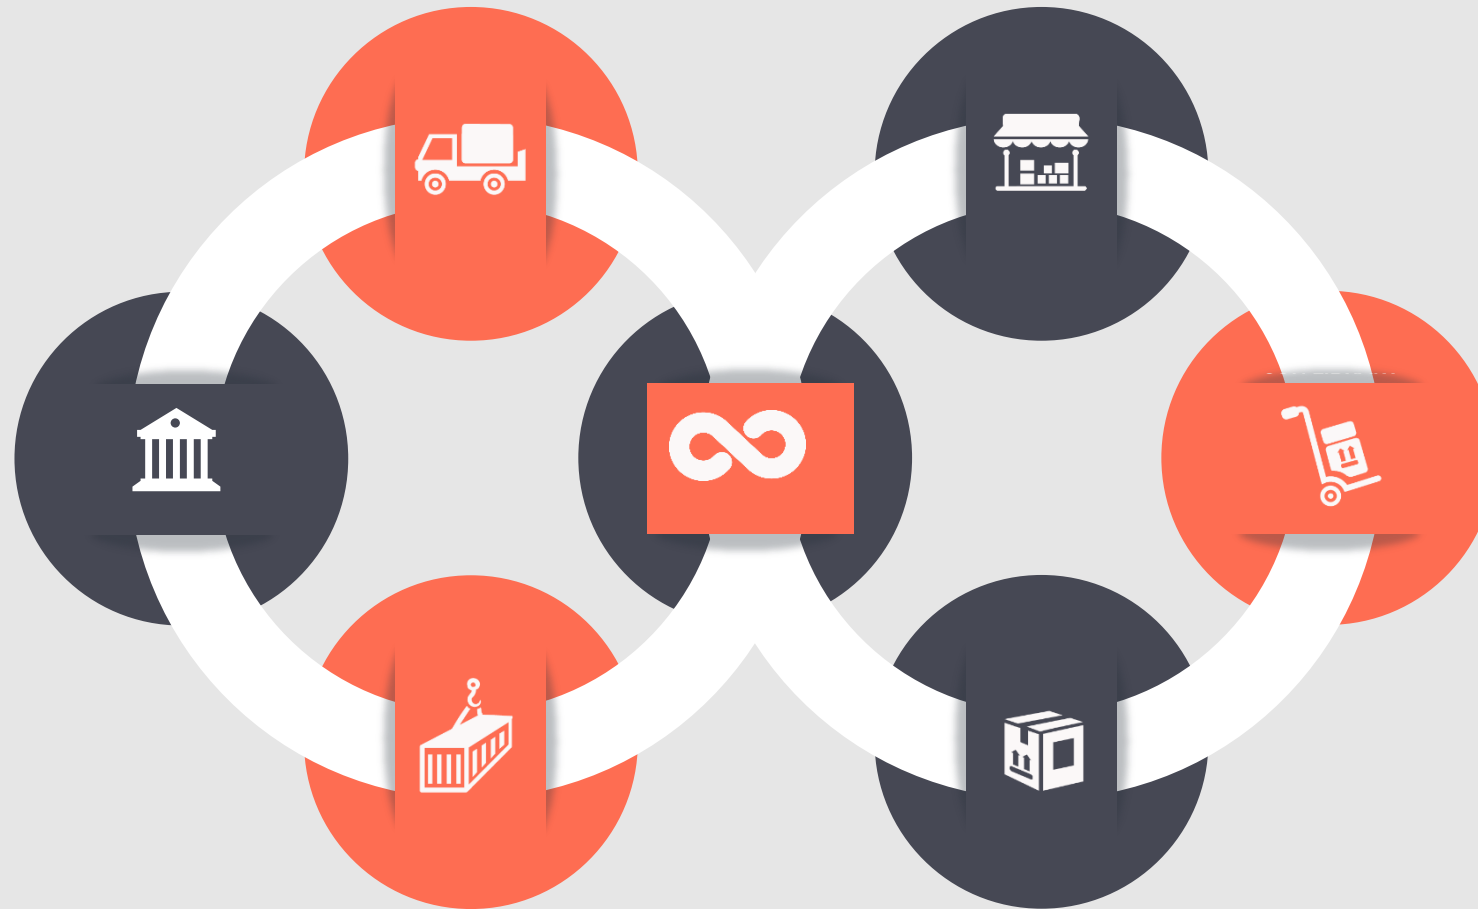

In case of any emergency, or alterations, the provision of change is also there

SUPPLY CHAIN MANAGEMENT

- **Purchase management**

The technology is here that can make the job of hours in seconds. With the help of ready to extract and read report function of the **ALGORAS software the purchase management** has become a simpler job. The business owners can save their time and the purchase managers have a reliable assistant to help them make great business decisions.

- **Material requisition planning**

The **ALGORAS MRP management software** minimizes the waste and loss of important work place requisitions. The workers are encouraged to behave in a more responsible manner. On the other hand, the branch office does not get the short end of the stick due to proper management of their work.

SALES INVOICING

CUSTOMER INVOICING

The ALGORAS Sales invoicing software solution is the ultimate tool that supports the sales person in the field. The job of a sales person is labor extensive and sending invoice copies to every department makes it more difficult for the sales people.

POS

The ALGORAS POS is great business solution for all online stores and business. Once the customer have made a decision to make a purchase, their money and amount would be added to the right accounts they have the ability to make sure that money is not getting tossed into unofficial accounts. The businesses can secure the buying interest of the customers forever. In this manner the customers are at a minimal risk and the businesses also increase and ensure the chances of their sales.

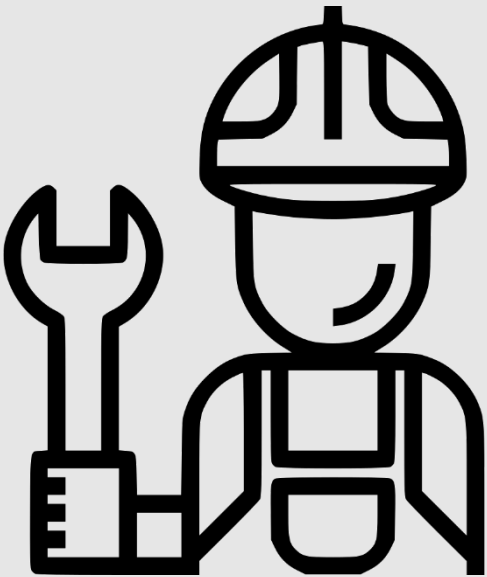

ENGINEERING

Project management

Project Management Tools

- Easy to understand and manage project management unlike the customary project management tools
- Any person without years of experience can understand how these projects work out.
- The working project adhere to the steadfast project projection in a tailor-made manner.
- The **ALGORAS project management software** provides easy integration methods and custom settings. The software is great for generating reports that can prove very helpful for the business. The project managers can extract vital information at any given point. The assistant supervisors can feed data from remote location that is ready for processing.

Customer Relation Management

01

CRM

Customer Relation Miracles

Managing customers is one of the most difficult jobs in the world. When the customers' queries start to pile up and there is no one to respond to them the customers get the frustrated with the business and revoke their invoices. To prevent order cancellations and to ensure that every customer get timely response, **ALGORAS customer management software** is an ideal tool.

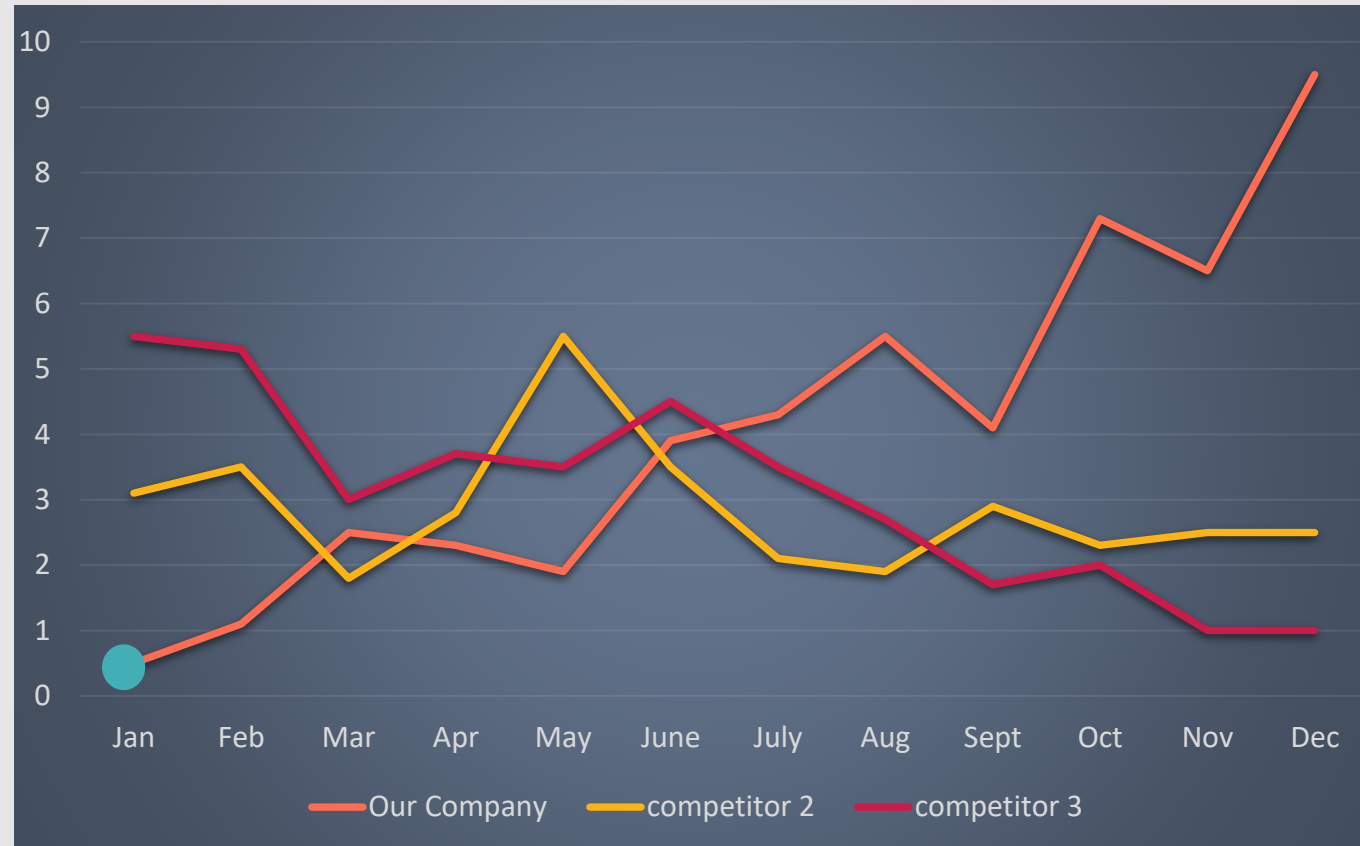

ANALYTICS & COLLABORATION

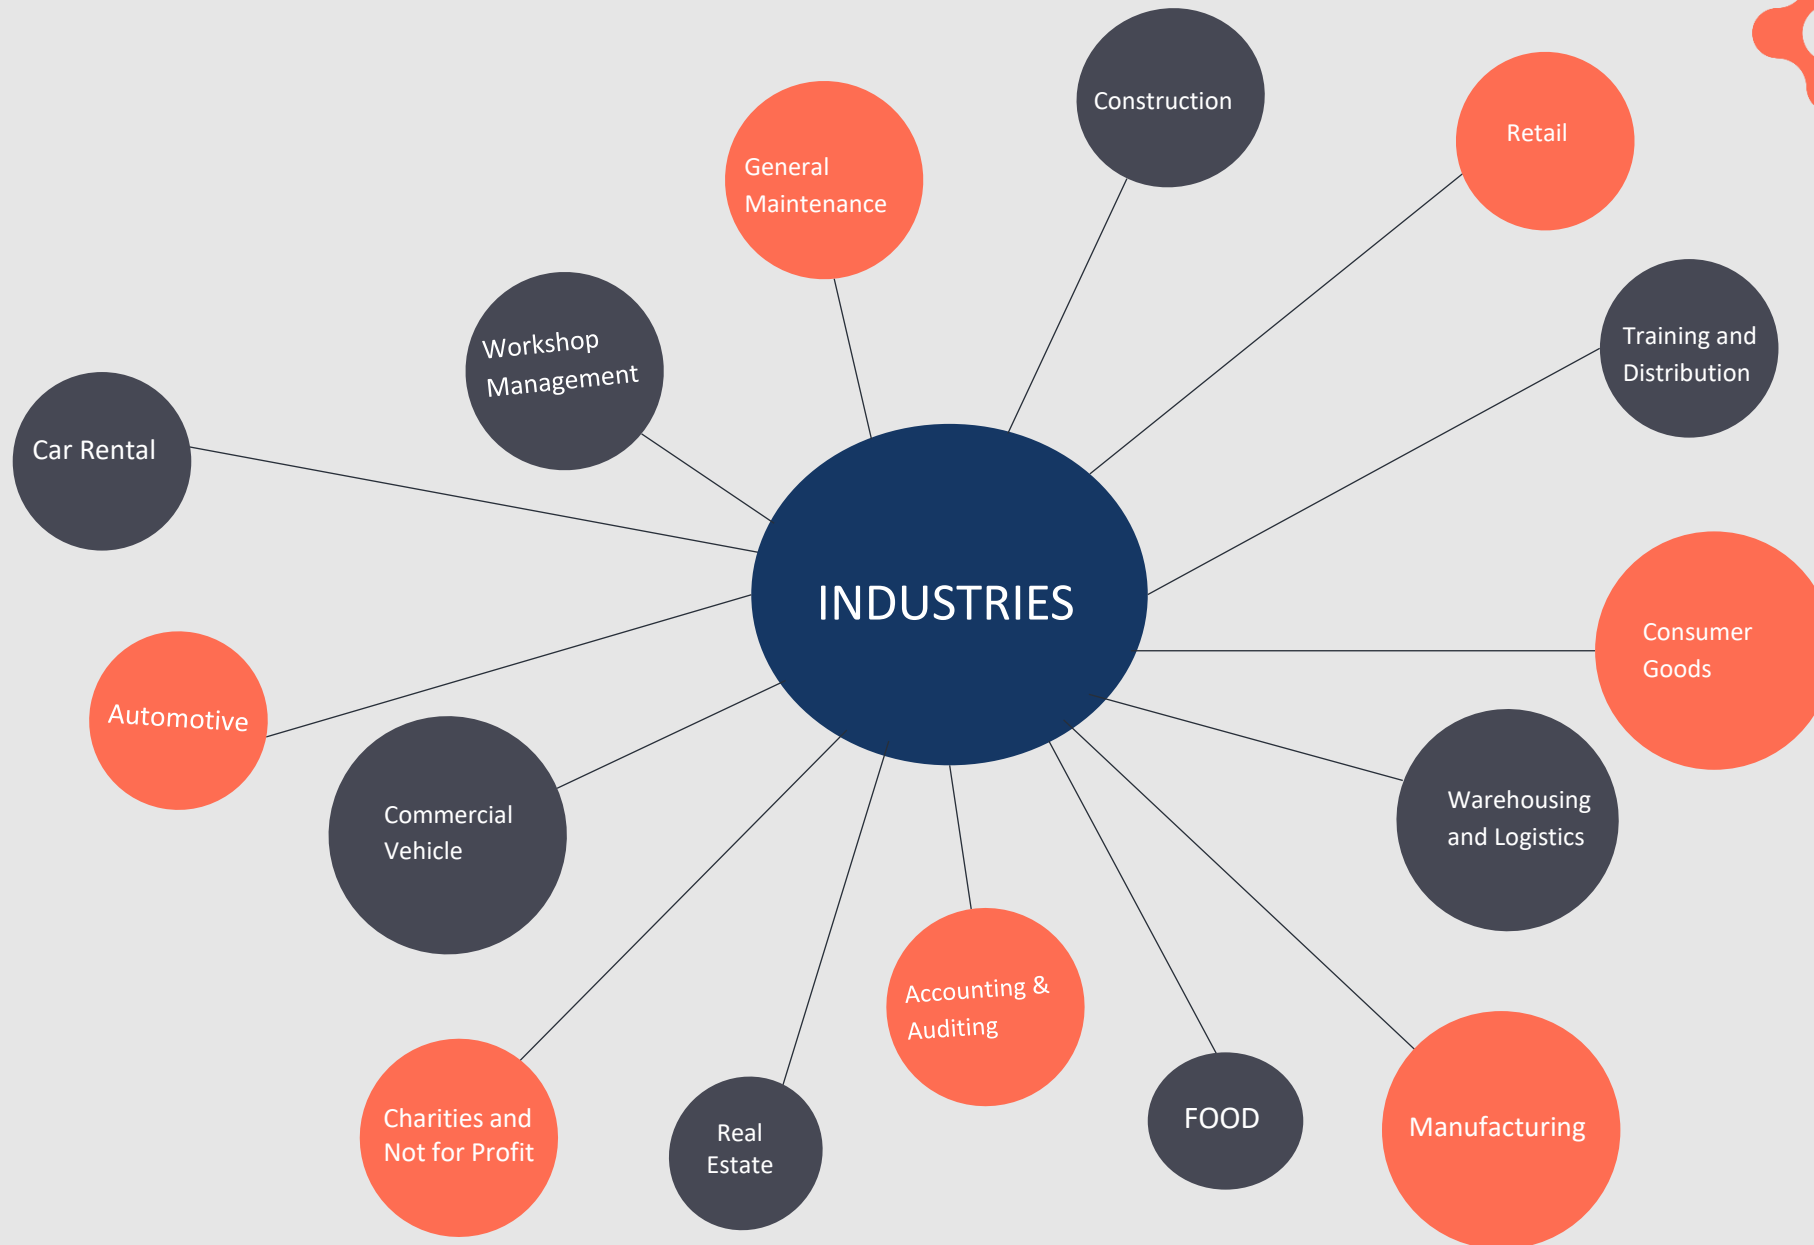

Dashboard

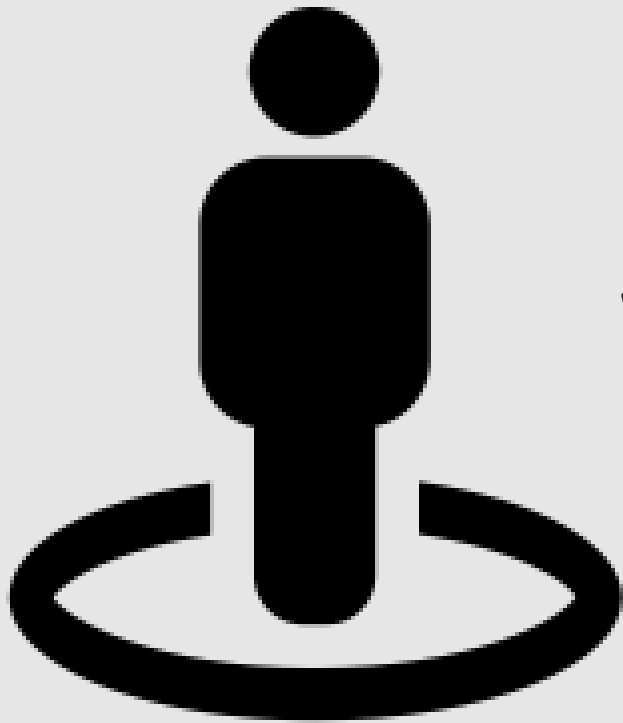

The ALGORAS Dashboard management is an all in one solution for the work place chaos. The workers can log in and start to work at the right time. The transfer of shift is made easier with the help of this software and furthermore the workers have a great propensity for keeping their work streamlined.
